Subject: Washington Works - Follow-Up from Conference Call

Jacque and Andy –

As follow-up to our discussions yesterday afternoon, I am attaching for consideration by EPA a proposed form letter that is to be used to contact the owners of approximately 31 private water supply wells in which PFOA at levels between 0.07 ppb and 0.40 ppb were previously detected. The letter reflects the process that I described during our conference call. I have passed along the question you raised regarding bottled water and hope to have an answer in the near future.

In the meantime, please let me know if you have any questions regarding the letter. Chemours is ready to start issuing the letters as soon as we have the green light from EPA.

Best regards.

Michael
